ARTICLES OF INCORPORATION
OF
TEL-ONE NETWORK SERVICES, INC.

FILED *gmr*
Secretary of State
State of California

lcc MAR 30 2016
inc

ARTICLE I

The name of this corporation is (hereafter "Corporation"): Tel-One Network Services, Inc.

Article II

The purpose of the Corporation is to engage in any lawful act or activity for which a corporation may be organized under the General Corporation Law of California other than the banking business, the trust company business or the practice of a profession permitted to be incorporated by the California Corporations Code. The existence of the Corporation is perpetual

Article III

The name and address of the Corporation's initial agent for service of process, for the State of California, is Joshua A. Ridless, 500 Washington Street, Suite 700, San Francisco, CA 94111.

Article IV

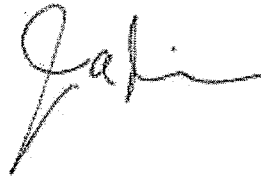

The initial street and mailing address of the corporation is 635 Potrero Ave., San Francisco, CA 94110.

Article V

This Corporation is authorized to issue only one class of shares, which shall be designated "Common Shares". The total number of such shares authorized to be issued is Ten Million. Each share shall have a par value of \$0.0001.

I declare that I am the person who executed the foregoing Articles of Incorporation, which execution is my act and deed.

Executed in San Francisco, California, on March 30, 2016.

Joshua A. Ridless, Incorporator

I hereby certify that the foregoing
transcript of _____ page(s)
is a full, true and correct copy of the
original record in the custody of the
California Secretary of State's office.

Telephone Corporation Surety Bond

Bond No. 57BSBHL1436

That We, Tel-One Network Services, Inc. (hereinafter called Principal) of San Francisco, California, as principal, and Hartford Fire Insurance Company (hereinafter called Surety) of Hartford, Connecticut, a corporation duly organized under the laws of California, as surety, are bound to the Public Utilities Commission (hereinafter called Obligee or CPUC), as Obligee, in accordance with the provisions of the CPUC Decision 13-05-035, issued June 3, 2013, in Rulemaking 11-11-006, in the full amount of Twenty-Five Thousand Dollars (\$25,000.00) for the payment of which we, the said Principal and the said Surety, bind ourselves, our representatives, successors and assigns, each jointly and severally, firmly and unequivocally, by these presents.

WHEREAS, the Principal is licensed by the Obligee as a Telephone Corporation under the provisions of the California Public Utilities Code and;

WHEREAS, the Principal is required to post a performance bond pursuant to CPUC Decision 13-05-035 for the full and prompt payment of any monetary sanction (i.e. fines, fees, surcharges, taxes, penalties, and restitution) imposed against the Principal, its representatives, successors or assigns, in any CPUC enforcement proceeding brought under the California Public Utilities Code and CPUC Decisions applicable to Telephone Corporations.

NOW, THEREFORE, if the Principal shall fully comply with the requirements of the California Public Utilities Code and CPUC Decisions applicable to Telephone Corporations, the above obligation shall be void; otherwise to be continuous and remain in full force and effect. This bond shall become effective on the 15th day of May 2016 and shall be continuous. Regardless of the number of years this bond may remain in force, the liability of the Surety shall not be cumulative, and the aggregate liability of the Surety for any and all claims, suits, or actions under this bond shall not exceed twenty five thousand dollars (\$25,000.00).

The Surety may cancel this bond by giving thirty (30) days written notice of such cancellation to the CPUC and the Principal by certified mail, it being understood that the Surety shall not be relieved of the liability that may have accrued under this bond prior to the date of cancellation. The Principal must secure a replacement performance bond before the expiration of cancelled performance bond and provide written notice to the CPUC of proof of the replacement performance bond.

The Principal shall provide written notice to the Surety of any attempt by the Principal to transfer or encumber utility property pursuant to the California Public Utilities Code, Article 6, sections 851, *et. Seq.*

Signed, Sealed and Dated this 10th day of May, 2016.

EXHIBIT F

Procedure for Obtaining
Expedited Review of the CEQA Exemption Request:

- A. Prior to ground-disturbing construction, Applicant will provide the Commission Energy Division with:
1. A detailed description of the proposed project, including:
 - a) Customer(s) to be served;
 - b) The precise location of the proposed construction project; and
 - c) Regional and local site maps.
 2. A description of the environmental setting, including at a minimum:
 - a) Cultural, historical, and paleontological resources;
 - b) Biological resources; and
 - c) Current land use and zoning.
 3. A construction work plan, including:
 - a) Commission Preconstruction Survey Checklist--Archaeological Resources;
 - b) Commission Preconstruction Survey Checklist--Biological Resources;
 - c) A detailed schedule of construction activities, including site restoration activities;
 - d) A description of construction/installation techniques;
 - e) A list of other agencies contacted with respect to siting, land use planning, and environmental resource issues, including contact information; and
 - f) A list of permits required for the proposed project.
 4. A statement of the CEQA exemption (s) claimed to apply to the proposed project.
 5. Documentation and evidence sufficient to support a finding that the claimed CEQA exemption(s) apply to the project.
 6. A proof of service showing that Applicant has served a copy of the above information on the city and county in which the project, if approved, will be constructed.
- B. Review by Commission Energy Division.
- The Commission Energy Division will then review the submission and notify Applicant of either its approval or its denial of Applicant's claim for CEQA exemption no later than 21 days after the date on which Applicant's submission is complete.
- C. Approval of Claimed CEQA Exemption (s)/Notice to Proceed.
-

If the Commission Energy Division approves Applicant's claimed CEQA exemption (s), the staff will prepare a Notice to Proceed (NTP) and file a Notice of Exemption with the State Clearinghouse, Office of Planning and Research.

D. Disapproval of Claimed CEQA Exemption (s).

If the Commission Energy Division disapproves Applicant's claimed CEQA exemptions, ED Staff will issue to Applicant a letter which states the specific reasons that the claimed CEQA exemptions do not apply to the proposed project.

If the Commission ED disapproves Applicant's claimed CEQA exemption (s), Applicant shall redesign the specific project and facilities and reapply for a finding of exemption from CEQA. In the alternative, Applicant may choose to file a formal application with the Commission seeking approval for the project, and undergo CEQA review before commencing any full facilities-based construction activities.

Applicant shall not engage in any construction activity relating to a pending CEQA exemption request before receiving a NTP from ED Staff. Applicant must follow the above procedures unless and until the Commission adopts different requirements for CEQA review, which are applicable to Applicant, in a subsequent proceeding.

If Applicant wishes to pursue full facilities-based construction projects other than as described in its CPCN Application, Applicant shall file for additional authority from the Commission and shall undergo any required CEQA review before commencing construction.

EXHIBIT G

Tel-One Network Services, Inc.

SERVICE AREA

Tel-One's service area will initially be limited to the approximate boundary of the City and County of San Francisco, as defined by the U.S. Census Bureau Tracts 06075010100 – 06075990100.

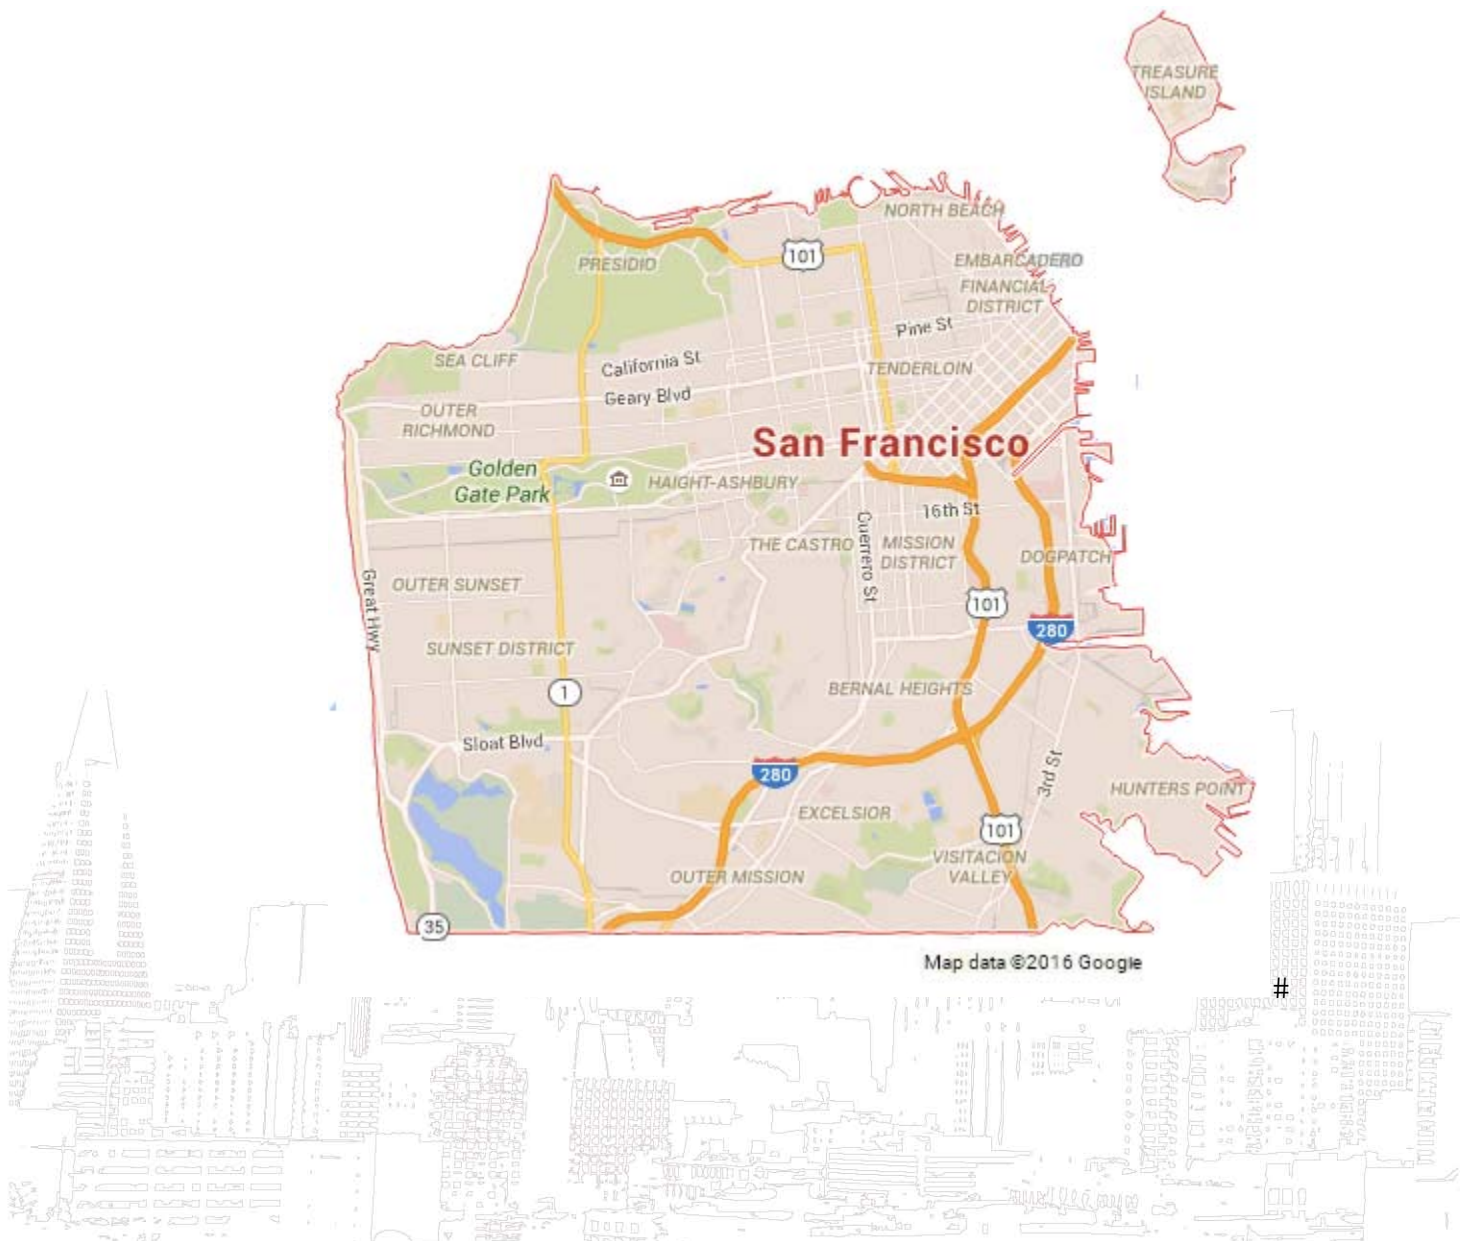

EXHIBIT H

Tel-One Network Services, Inc.

August 16, 2016

Statement of Services offered pursuant to General Order 96-B (Industry Rule 5).

Tel-One Network Services, Inc. proposes is to offer affordable high-speed broadband (50 megabit and higher) internet services to residential and commercial customers located within the City and County of San Francisco, California. Specifically, Tel-One Network Services, Inc. desires to provide the following services:

Specifically, Tel-One Network Services, Inc. will be providing the following services:

- a) Broadband¹ delivered to residential and commercial subscribers using fiber optic cabling that is either (i) leased from other companies, or (ii) placed within existing right-of-way and/or conduits that are leased from other companies;
- b) Wired broadband delivered to residential and commercial subscribers using HDLC ("High-level Data Link Control") protocol over traditional copper cabling. (Typically used within a building to deliver INTRA-building internet services) utilizing existing in-building (riser) facilities.
- c) Broadband delivered to residential and commercial subscribers using low power point-to-point microwave communication facilities using FCC-approved spread-spectrum technologies.

¹ For purposes of this filing, High Speed Broadband Service means any high-speed Internet Service operating at a speed of 50-megabit and higher.

EXHIBIT I

Career Summary

25 Years of Experience developing extremely large scale, highly efficient and accurate Database Applications, for commercial, government, aerospace, telecommunications and payroll industry, with special emphasis in IVR systems.

- | | | |
|---|--|---|
| ■ Database transition planning and disaster recovery experience | ■ Client-Server Database Application Design and Development | ■ Developed extremely high performance IVR system (1.5m calls/day) |
| ■ Efficient Database Design through Data modeling | ■ Full understanding of Database libraries, and transaction handlers | ■ Deep knowledge of Electronic Time Keeping Techniques |
| ■ Efficient Database Table Structuring and Indexing Techniques | ■ RDO/ADO interface techniques, incl. port 1433 direct interface | ■ Point of Sale Time Keeping Integration with Payroll |
| ■ Comprehensive data transformation, tallying through data analysis | ■ VB6 and .NET(2.0) bonded objects AND non-bound objects | ■ GPS "as-Time Keeping" object, tracking, and analysis techniques |
| ■ Presentation of sophisticated data in easily-understood terms | ■ Web-Services data integration and multi data-source integration | ■ Networked Multi-Location Database Components related to Timekeeping |
- An early investor in, and partial developer of QL2, a data-analysis tool for turning web-pages into rich-data searchable sources of information. QL2's customers include 7 of the top 10 global airlines, 5 of the top global online travel agencies, and Global 100 energy, car rental, retail, pharmaceutical and life science companies.

Professional Experience (*consulting that resulted in deliverables*)

University of Illinois, Champaign-Urbana (1986, 1987, 1988). Employed to Program computer terminals attached to a Mainframe computer system (PLATO) that were used to generate databases containing class schedules based upon prospective students' interests and SAT scores. Curriculum was graphically represented on Plasma Display Terminals attached to the University's PLATO computer Plato Computer Mainframe. Student Curriculums included travel time between classrooms in different buildings and items related to classroom proximity. Worked under the auspices of Don Bitzer, inventor of the Plato Computer System and co-inventor of the Plasma Display Panel, and Hugh Satterlee, Ombudsman of the University of Illinois, Champaign-Urbana.

Computer Services Office, San Joaquin Delta College, Stockton California (1991, 1992). Maintained campus-wide network of mainframe-based computer terminals used for class scheduling and curriculum development;

Delta Telecommunications, Stockton, Ca (1993). Founded a California Based Public Utility (U-5410-C) focusing on a network of telephone switching systems connected to databases that were used to route telephone calls of customers within the State of California. I invented the efficient IXC-10 Network Switch and the associated databases, as there were no highly efficient telephone switches during that time that took up a small amount of space, yet could handle the demands of a full-scale telephone switching office.

Tel-One Network Services – 635 Potrero Avenue - San Francisco, Ca 94110 - (209) 915-2483 cell

TelSwitch, Inc., Stockton, Ca (1994). I authored the Airnet Billing and Call Collection Database software that was used at TelSwitch, Inc for the purpose of billing residential and commercial long distance customers for the calls that they made. I wrote database formulas to establish the rating of telephone calls based upon the elements provided by the switching network: call setup, call type, call routing, and rate plan assigned to customer. Determined the rates and taxes to charge the customers on each call, based upon the rate plans assigned, the time of day, the time and duration of the call, and whether that call was intrastate, interstate, or Intra-lata. Processed millions of telephone calls through my database.

Japan Telecom America, San Ramon, Ca (1996). I adopted the Airnet Billing Software and Call Collection Database that I had authored to specifically meet the needs of an international telecommunications corporation doing business in the United States, Japan, and in Canada, presenting bills to customers in multiple languages and font sets, accepting various currencies, which all had to be computed against the dollar in real time.

Oersted Corporation (Sunstrand Contract) (1997). Designed and authored an Automation Control and Database system used for the mass-production of mission-critical magnetic armatures used in Air Conditioning, and Electric Vehicle, and Aerospace applications. I created the process control mechanism that allowed the machine to “manufacture the part” and measure the results, and report the results to a master database that contained Quality Control statistics. This machine continues to operate at a Sunstrand Corporation facility in Wisconsin and has successfully manufactured hundreds of thousands of components.

Network Services Solutions, LLC., Reno, Ca (2001). Customized a database for tracking the overlapping time elements of telephone calls, and establish audit trails of telephone calls through the phone network, based upon origination, destination, time, and jurisdiction. The system is in use to track the costs for telephone lines and services to hundreds of schools, dozens of hospitals, and is the backbone for a national communication network, with over five million transactions being tracked through my database monthly.

Decisionet, St. Charles, Il. (Experian Project) (2004). I was contacted to build a Database and Electronic Gateway “Appliance” Device for customers to acquire credit reports from Experian’s secure database. The system was used to facilitate the delivery of 7.2 million credit reports to commercial users, including credit unions, banks, car dealerships. The system tracked usage, report lengths, type of reports, and reporting tools to Experian’s customers to view the quantities of reports that were used through the system, types of reports, and other information pertaining to the acquisition of reports. The service allowed Decisionet to extend the life of legacy interface environments between Experian and its’ clients by several years.

BankVOD / Billing Solutions, Inc. - (Bank of America, Wells Fargo Bank, JP Morgan Chase, PNC, Bank of the West) (2005). Designed and built a network of Database Applications for the mortgage industry using Microsoft SQL and ASP.net. The system created a protocol for banks and mortgage brokers to exchange information on the status underwriting of loan applications, providing tracking of Verification of Income, Verifications of Deposit and Verification of Mortgage applications, as well as providing the analysis back to the banks for items such as Check Verification(s). The database also triggered the disbursements of processing costs and reimbursements toward the banks. To date, my system has been an integral part of the processing of over 1.2 million mortgage applications.

SAIC - Patriot Missile Systems / Training Division (Subcontract) (DPAS Rated) (2007). Designed the hardware, software, and firmware used within the modern-day re-instrumented version of Patriot Missile consoles. I was tasked with developing a hardware and software combination that retained full compatibility with both modern and legacy equipment, that could provide data to commercial and proprietary databases efficiently and reliably in extreme environments. I am proud that my work is considered to be an integral part of the battle-field readiness and preparedness of ground troops, and that dozens of our implements are in use throughout the world.

Tel-One Network Services – 635 Potrero Avenue - San Francisco, Ca 94110 - (209) 915-2483 cell

Department of Justice, Sacramento California (2007). Authored a specialized interface to work with a telephone company database.

Practice Technologies, Inc. (2007). I was contracted to develop the database to maintain the billing and session tracking portion of Real Deal Docs, part of the Real Practice Suite of document management tools used by dozens of law firms, including Littler. I had been tasked with developing the billing methods for tracking the use of Real Deal Docs, a Web Site that indexes the documents that are filed by publicly-held companies, into searchable terms, and maintaining presentations.

Cogent Communications, Inc. (2008). I was tasked with authoring the database system for tracking the timings and overlaps of telephone calls, and establishing an audit trail of telephone calls through the phone network, based upon time, duration, origination, destination, and other characteristics. The database continues to be used to capture hundreds of thousands of telephone transaction per month that traverse the Cogent Communications Network, and maintains a detailed audit trail of service changes and inventories of equipment and.

Gallium Visual Systems - ATS (Air Traffic Control System) (2008). Incorporate modern software, hardware, and firmware into Aircraft Control Training Systems. I was tasked with manufacturing Operator Keyboards and Consoles using modern day technologies as part of the Air Traffic Control Training System, enabling ATS equipment to work with USB-enabled computers, and modern data collection systems, including databases.

First National Collection Bureau, Reno, Nv. (2008). Built a system of interconnected databases and computers capable of capturing over 250 million telephone records per year, and deep-content analyze the telephone calls for type-of-call, timing characteristics, and customer contact effectiveness. System had to maintain a minimum of 56 million phone calls per year, any of which could be instantly retrieved. The Microsoft SQL database components required that I author an exacting set of high-performance SQL database analysis scripts in conjunction with several inter-related computers, all operating autonomously operating software programs that I wrote. I have been told that I wrote the highest performance (civilian use) telephone call analysis system in the world.

American Automated Payroll, Charleston, Sc (2009) - Payroll and Time Keeping. I Authored a set of scripts to work with databases to allow payroll companies to integrate their payroll systems with the telephone network. The program that I wrote allows the electronic entry of time keeping records via telephone. Employees can use a telephone to clock in and out of work sites, or an employer can use the telephone to enter time entries into their payroll production. I am an ongoing consultant to American Automated in the area of timekeeping, payroll database integration, paycheck and time clock reporting, and phone network integration. Additionally, I authored a database system that comprises of an automated inbound and outbound calling interface for customers of payroll companies to be able to input their daily time sheets into payroll programs, for purposes of generating payroll. The software and hardware mechanism that I authored interfaces with system such as "Evolution" (a popular and widely used payroll program), as well as Microsoft SQL, Oracle, and mySQL. American Automated Payroll and TelSwitch, Inc. are engaged in an ongoing partnership tasked with developing further market verticals for my software.

Reunion Communications, La Grange, Il (Airlink Wireless) (2010). Database for keeping track of usage, balances, and remaining minutes for a National Prepaid Wireless provider. I authored a database, and associated network interface protocol, so that customers may access real-time information about their accounts via telephone calls from their handsets. The system also maintains real-time analysis of telephone the telephone companies' databases to determine where the telephone callers are going to be routed, based upon their "OEM" handset ID, calling characteristics, and other factors. The Database, located downtown Los

Tel-One Network Services – 635 Potrero Avenue - San Francisco, Ca 94110 - (209) 915-2483 cell

Angeles, is used tens of thousands of times every day by prepaid mobile carriers and their customers all over the country, who rely my high-performance database application's speed and accuracy to delivery timely information on real-time usage.

Rapid Announce, a Product of TelSwitch, Inc. (2010). I authored the combined software (database) and hardware application that is used to conduct millions of daily inquiries into several linked databases. The databases, which contain approximately three hundred thousand new collection accounts per day, are analyzed to determine to whom automated dialers should call and what those called individuals are being contacted regarding. The calls are indexed, and are reported to time tracking databases for later analysis and quality assurance. The system is currently in use by collection bureau(s), and makes decisions on hundreds of thousands of transactions per day. The system is also had been used for automated notifications in several non-collection industries.

SAIC - Patriot Missile Systems / Training division (2011). Tasked with adopting some of the database SQL analysis tools that I use in expert database analysis toward use in personnel management and battlefield equipment positioning. Expand the methods I developed for analyzing GPS data points, so that data points coming from disparate data sources could uniformly be applied into databases and then analyzed. According to SAIC, the database formulas that I had applied in my capacity as an expert in the *Moreno, et al. v. J. Redfern, Inc.* (RG08375539) closely mimic the GPS data point analysis that is conducted GPS data points from projectiles (missiles) and personnel movement.

AggravationSense and VoiceVault, a Product of TelSwitch, Inc. (2011). Built a database to analyze the voice characteristics of telephone calls in real-time, to determine when someone becomes aggravated, so that they can be proactively routed to customer Service supervisors. VoiceVault contains approximately 130 characteristics of the human voice, and can be used to determine whether a telephone caller is who they say they are, with a very high degree of accuracy. The partners in this project were Qwest, AT&T Business Services, Network Services Solutions LLC, and American Automated Payroll;

Education:

San Joaquin Delta College (1991-1994); Majored in Sociology and Cultural Anthropology.

Publications, Awards, Authored Works

1996, Young Entrepreneur of the year, San Joaquin County; California.

Authored Foundational White Paper on Voice Over Internet Protocol, and filed patent application on Wide Area Centrex using Internet as Communication Backbone, as part of the Tempo Networks LLC partnership between me and two of the co-founders of Worldcom.

Authored patent application for SMS (Text Message) Initiation of a telephone call between two people by connecting two outbound calls initiated by a phone switch in a foreign country. One leg was placed to the "initiating party" and the other leg to the "called party", which were connected together to create a circuit through an intermediate county.

Co-wrote a paper presented to DARPA on the best-practices method of designing a database to conduct the analysis of large volumes of Telephone Calls. Authored in conjunction with Ted Kubaitis, the founder and Chief Software Architect of QL2.

Analysis of Scheduled Flights and the Merger Effect on Flight Availability re: Merger of United Airlines and Continental Airlines (Declaration) – In Matter of the Merger of United Airlines and

Tel-One Network Services – 635 Potrero Avenue - San Francisco, Ca 94110 - (209) 915-2483 cell

Continental Airlines, before the Senate Judiciary Subcommittee to Examine United/Continental Merger, May 27th, 2010, 2:15pm – Dirksen-226

Professional Certifications:

1994-2011; Certification Granted by California Public Utilities Commission (U-5410-C) to operate as a California Public Utility, after passing the standards for expertise necessary related to the operation of telephone communication systems and telephonic records database recording and billing / rating mechanisms.

2004; NACHA certification achieved for network integration of Payment Transaction Processing between financial institutions; (Bank Interchange Network).

2006-2012; Credit Card Interchange Network Certification issued by Global Payments for Software written by Aaron Woolfson related to the Networked Interchange of card member payment transactions between merchants and correspondent banks, on behalf of Master Card/Visa/American Express/Discover.

2010-2012; Certificate of PCI DSS Compliance issued by Security Metrics for maintaining best-practices in database management related to secure transaction processing between mechanized database systems.

Partial List of cases that the court has relied upon my expert findings in Class Certification matters:

Avalos v. La Salsa, Inc.	Mallison & Martinez	Santa Barbara County Superior Court, Case No. 1189077
Domonique Hines vs. KFC	Rastegar & Matern Altshuler Berzon	09cv2422 JM(POR)
Rafael De La Rosa, et al. v. UBS (United Building Services)	Rastegar & Matern	077CC01206
Gutierrez, Salazar et. al v. Commerce Casino	Rastegar & Matern	Superior Court, Los Angeles - BC360704
Adriana Larios v. Moana Hotel And Restaurant Group, LLC, Et Al	Mallison & Martinez	Superior Court, County of Marin - CV082368
Ranwick v Texas Gila, LLC, a Texas limited liability corporation d/b/a Municipal Services Bureau	Moss & Barnett	0:13-cv-02792-RHK-SER

In addition to the above cases, I have been retained as either a consulting or testifying expert in database analysis in over 160 cases, - approximately 90% of which are class actions.

I have worked with both plaintiffs and defendants. I have been asked to analyze timekeeping, payroll records, telephone call records, credit card records, reimbursement records, and travel records (e.g., gps data and locations where employees worked), as well as provide analysis of technology related to Call Center and Collection Operations.

EXHIBIT J

SWORN AFFIDAVIT

Name of Applicant/Company Tel-One Network Services, Inc.

My name is Aaron Woolfson. I am President of Tel-One Network Services, Inc. (Applicant). My personal knowledge of the facts stated herein has been derived from my employment with Tel-One Network Services, Inc.

I affirm that Tel-One Network Services, Inc.:

- agrees to comply with all federal and state statutes, rules, and regulations, (state whether application is for a Certificate of Public Convenience and Necessity (CPCN), Transfer, Merger, etc.) and state contractual rules and regulations, if granted the request as stated in this application; and
- Certifies that all answers to the attached Application for CPCN are true and correct;
- In the event Applicant's request for a CPCN Applicant agrees to post a continuous bond (i.e., there is no termination date on the bond) performance bond equivalent to in the amount of \$25,000 for the first year of operation or 10% of intrastate revenue (for subsequent years), issued by a corporate surety company authorized to transact surety business in California, and with the Commission listed as the obligee on the bond. Further, I will provide a copy of the executed performance bond to the Director of the Communications Division with the written notification to the Commission of acceptance of operating authority.

I affirm and declare under penalty of perjury under the laws of the State of California, including Rule 1.1 of the California Public Utilities Commission's Rules of Practice and Procedure, that, to the best of my knowledge, all of the statements and representations made in this Application are true and correct.

A notary public or other officer completing this certificate verifies only the identity of the individual who signed the document to which this certificate is attached, and not the truthfulness, accuracy, or validity of that document.

EXHIBIT K

Tel-One Network Services, Inc.

**AN IMPORTANT MESSAGE ABOUT THE PRIVACY OF YOUR
CUSTOMER INFORMATION (CUSTOMER PROPRIETARY
NETWORK INFORMATION OR CPNI)**

The protection of our customer's privacy is of utmost importance to the employees and management of the Tel-One Network Services, Inc. Please take a moment to read the following important message about the privacy of your customer information.

Tel-One Network Services, Inc. provides Broadband Service via Fiber Optic cables to its customers. These facilities may also carry interconnected Voice over Internet Protocol (VoIP) service (which permits VoIP customers to both send and receive calls to/from customers with traditional telephone / telecommunications service).

Tel-One Network Services, Inc. will only share your information with its outside vendors (such as facilities maintenance organizations with whom we contract with) for the purpose of identifying problems within the network (i.e. trouble-shooting purposes) – but not for marketing purposes.

Tel-One Network Services, Inc. may also maintain a review of the general types and destinations of traffic (i.e. which network peers we are sending traffic to) in order to optimize the network to achieve transmission efficiencies and higher bandwidth throughput. The general information that we will look at will consist of destination IP and port addresses, and network latency. We do not look at the content of the IP ("internet protocol") packets, nor do we maintain logs of sites visited. We do not maintain (cache) any content.

Tel-One Network Services, Inc. will use your information that we gather for internal marketing purposes to offer additional products and services, such as offering increased bandwidth products, etc.

Why are we required to provide this CPNI statement?

Your CPNI includes the types of telecommunications and interconnected VoIP services you currently purchase, how you use them and the related billing information for services. CPNI does not include your telephone number, your name or your address.

Protecting the confidentiality of your CPNI is your right and our duty under Federal Law. As a Tel-One Network Services, Inc. customer, you can restrict the use of your CPNI with Tel-One Network Services, Inc.

Tel-One Network Services, Inc.

To allow Tel-One Network Services, Inc. to use your CPNI, no further action is required. Tel-One Network Services, Inc. and our authorized agents will not sell trade or share your C.P.N.I. with anyone other than those who work directly with Tel-One Network Services, Inc. to provide services (i.e. outside facilities vendors, etc.) or are Tel-One Network Services, Inc. authorized agents, unless we are required to do so by law.

If at any time you would prefer that Tel-One Network Services, Inc. not use your CPNI to offer you additional products and services, you may:

- (a) Email us:
admin@tel-one.net
- (b) Call us:
(415) 688-2289
- (c) Write to us:
Tel-One Network Services, Inc.
286 12th street
San Francisco, Ca 94103

Your decision to permit or restrict the use of CPNI will remain in effect until you decide to change it – which you can do at any time without charge.

Restricting our use of your CPNI will not affect the provision of any Tel-One Network Services, Inc. products or services to which you currently subscribe.

You will receive this statement in a mailing, at a minimum, when:

- (a) You first sign up for service.
and/or
- (b) At least once every year.

Thank you for choosing Tel-One Network Services, Inc.
We appreciate your business.
